

18- Plato, Athens, Atlantis and the Boto. (Boto=Pink river dolphin of Amazon)

This suggestion is based on the observation of the ocean floor drag marks pattern worldwide and is part of Poike's theory quilt of information.

Plato scenario is chaotic, talking about the time the Atlantic was navigable, and then a mud barrier covering it all around 9.000 before his time (360 BCE). *We related that to the continental drift.*

Critias -By Plato - Written 360 B.C.E

Translated by Benjamin Jowett

(some parts of the dialogue)

... by the kings of Atlantis, which, as was saying, was an island greater in extent than Libya and Asia, and when afterwards sunk by an earthquake, became an impassable barrier of mud to voyagers sailing from hence to any part of the ocean. ...

... their names are preserved, but their actions have disappeared by reason of the destruction of those who received the tradition, and the lapse of ages. ...

... Many great deluges have taken place during the nine thousand years, for that is the number of years which have elapsed since the time of which I am speaking; and during all this time and through so many changes, there has never been any considerable accumulation of the soil coming down from the mountains, as in other places, but the earth has fallen away all round and sunk out of sight. The consequence is, that in comparison of what then was, there are remaining only the bones of the wasted body, as they may be called, ...

... For the fact is that a single night of excessive rain washed away the earth and laid bare the rock; at the same time there were earthquakes, and then occurred the extraordinary inundation, which was the third before the great destruction of Deucalion. ...

Timaeus -By Plato - Written 360 B.C.E

Translated by Benjamin Jowett

(some parts of the dialogue)

... Soc. Very good. And what is this ancient famous action of the Athenians, which Critias declared, on the authority of Solon, to be not a mere legend, but an actual fact? ...

... Crit. ... Thereupon one of the priests, who was of a very great age, said: O Solon, Solon, you Hellenes are never anything but children, and there is not an old man among you. ...

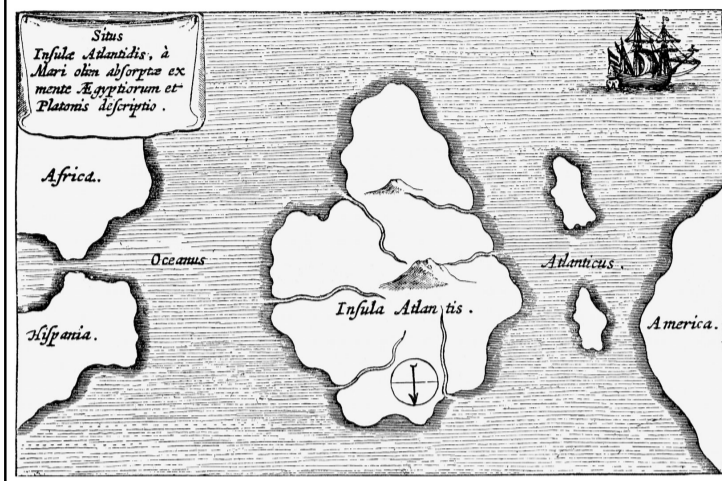

... Solon marvelled at his words, and earnestly requested the priests to inform him exactly and in order about these former citizens. ...

... is recorded in our sacred registers to be eight thousand years old. As touching your citizens of nine thousand years ago, ...

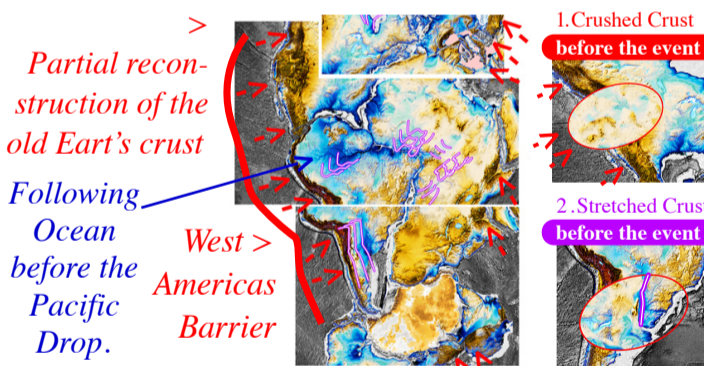

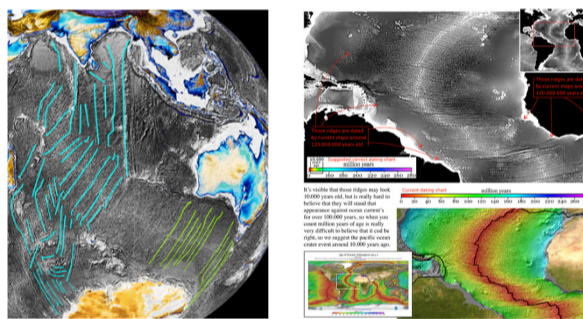

... This power came forth out of the Atlantic Ocean, for in those days the Atlantic was navigable; and there was an island situated in front of the straits which are by you called the Pillars of Heracles; the island was larger than Libya and Asia put together, ...

.. But afterwards there occurred violent earthquakes and floods; and in a single day and night of misfortune all your warlike men in a body sank into the earth, and the island of Atlantis in like manner disappeared in the depths of the sea. For which reason the sea in those parts is impassable and impenetrable, because there is a shoal of mud in the way; and this was caused by the subsidence of the island. ...

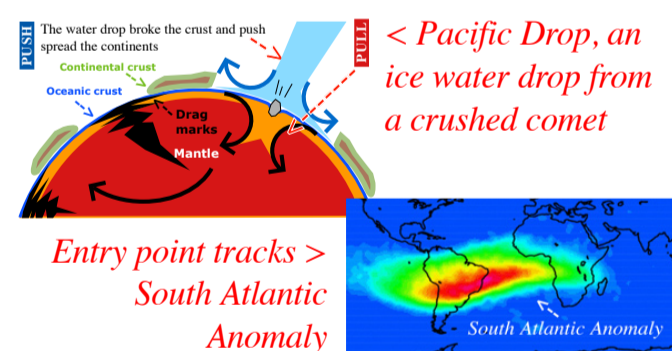

This map may not be upside down, its possible to be the configuration before the pacif drop, with the continental drift as consequence.

based on the observation of the ocean floor drag marks pattern world wide, we define the Pacific drop event as the power engine for the continental drift, analyzing the ocean floor pattern you realize the current dating is questionable when you compare age, versus a state of conservation of the ocean floor.

Aligning Plato event with our Pacific Drop from Poike's Theory to be around 10.000 years ago, we may also have a living proof of mud barriers, the Boto of Amazon, (pink dolphin of amazon jungle) a living fossil like by isolation into the amazon bay, trapped at this very same event, the Pacific Drop.

* As far as I concern is possible that Atlantis being crushed up in the Tibetan Plato or sunken at the bottom of lake Titicaca, in order to understand that we have to rebuild a model of the old Earth according to the drag marks pattern, so further research must be done.

Crime Scene Investigation EARTH

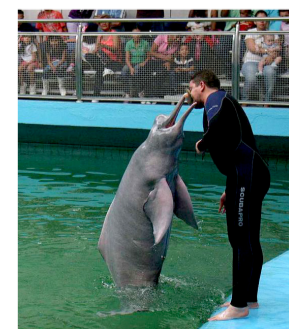

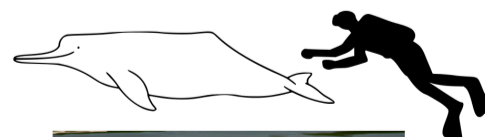

Boto = pink river dolphin of amazon is often considered primitive dolphins.

In this map you can see where families of dolphins were caught in this event that raise a wall on the west side of the Americas, in a single day, the ocean was divided and the dolphins trapped, locked up, on what used to be an ocean (maybe part of the Atlantis of Plato) so around 10.000 years ago this group of dolphins, trapped in the amazon basin start to adapt from salt water to fresh water coming from the newly created mountain range.

Boto of Amazon populations

West Americas barrier

Note: Other occurrences of rapidly exposed oceans can seem all over the world like Bacia do Araripe, Ceara, Brasil, and Valley of the Whales, Wadi al-Hitan, Egypt, were you can see trapped and fossilized sea creatures. all of that result of the large and rapid land mass displacement. (Pacific Drop Event)
