

19 - Drag Marks Pattern I

Either you deny this ocean floor drag marks pattern or deny the current ocean floor dating, but you can't have both, due to many controversial facts we present in this theory.

< - North Pole

South Pole - >

<- One strong point of controversy is the drag marks pattern and the ocean floor spread dating, you can see the Asia lines cross over the today line in three different places. ? And is a clean track look for yourself.
